About Me

Software Engineering student at Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA) passionate about AI, cloud computing, full-stack development, data analytics, and silicon validation. Experienced in machine learning, Flutter, and Power BI. A fast learner with strong Python and problem-solving skills, eager to grow as an engineer. Available for internship from August 2026 to January 2027.

Education

Bachelor of Computer Science (Software Engineering) (Hons.)

Universiti Malaysia Pahang Al-Sultan Abdullah
2023-2027 (Pekan, Malaysia)

Diploma in Computer Science (Information Technology)

Universiti Selangor (UNISEL)
2018-2022

TECHNICAL SKILLS

- Languages: Python, Java, C#, PHP, JavaScript, Dart
- Frameworks: Flutter, Laravel, TensorFlow, OpenCV
- Databases: MySQL, Firebase
- Tools: Git, VS Code, Power BI
- Cloud: AWS, Google Cloud
- Testing: Software Testing & QA

INTERNSHIP INTERESTS

- Software Engineering
- Machine Learning & AI
- Test Engineering
- Cloud Computing
- Data Science & Analytics
- Full Stack Development
- Mobile App Development
- Business Intelligence (Power BI)

PROJECTS

- Car Damage Detection using VGG16 — Python, TensorFlow, OpenCV (Awarded Best Thesis Poster)
- EcoSnap — Flutter, Firebase, REST API (Hackathon Winner)
- Parking Management System — Java, MySQL
- MoneyMattersBank — C#, SQL
- Samansphere — Laravel, PHP, MySQL

Awards and Certification

Hackathon Huawei x UMPSA 2025 (Track B) (Winner of Best Game App)

- Built EcoSnap, a Flutter-based social game app with strong UI/UX

UMPSA FYPro-Com Exhibition, Session II 2025/2026 (Best Thesis Poster Award)

- Research and developed an AI-based Car Damage Detection System using Python and an optimized VGG16 Convolutional Neural Network (CNN).

Hackathon Huawei x UMPSA AppGallery Mobile App Competition 2025 (Track A)

- Designed and pitched DengueSense, a mobile app for dengue risk awareness

HACKATHON X: PEKAN SMART CITY UMPSA 2025

- Developed a Laravel-based platform to centralize multi-agency summons payments

Datathon 2025, Universiti Malaya

- Performed financial data analysis and built time series forecasting models

Microsoft Power BI Beginner Workshop

- Power BI dashboard creation, data visualization, Power Query, and basic DAX.

Google Cloud Engineering Badge

- Hands-on experience with cloud infrastructure (IAM, VPC, Compute Engine)

AWS Cloud Practitioner Essentials

- Knowledge of cloud services, security, and AWS global infrastructure

CCNA: Introduction to Networks

- Learned networking fundamentals and performed configuration labs

ICT Training Certification (Web Development)

- Built and trained responsive websites using HTML, CSS, PHP, and Bootstrap

Work Experience

Web Developer Intern (Sept 2021 – Dec 2021)

Centre for Community Engagement (COMNET) , UNISEL – Selangor

- Developed and maintained 20+ responsive WordPress websites using PHP and MySQL.
- Implemented database integration and enhanced website performance and usability.
- Conducted web development training sessions for approximately 100 students.
- Represented COMNET at the Selangor Digital Economy Corporation (SDEC) Conference.

Language

English — Fluent

Bangla — Native

Malay — Basic

Hindi — Basic
